EDUCATION

Vidyalankar Institute of Technology

Bachelor of Technology - Information Technology - CGPA: 9.28/10

2022 - 2026

Mumbai, India

SSC And HSC

SSC - 95.80% | HSC - 77.68 %

2019 - 2022

Chh. Sambhajinagar, India

TECHNICAL SKILLS

Languages: Python, C++, HTML, CSS, JavaScript, SQL, PHP, Node.js

Frameworks: Flask, React, Express.js

Technologies: Machine Learning, GenAI

Database: MySQL, MongoDB

Visualization: PowerBi, Matplotlib, Tableau

Coursework: DBMS, DSA, OS, CN

EXPERIENCE

VPNDS: [Python Development Intern]

June 2025 - Dec 2025

Remote

- Developed a comprehensive digital forensics investigation Electron Desktop Application for police departments using Flask backend and JavaScript frontend, enabling law enforcement officers to analyze CDR (Call Detail Records), SDR (Subscriber Detail Records), and IPDR (Internet Protocol Detail Records) data with advanced search and filtering capabilities for criminal investigations.
- Implemented multi-source intelligence gathering tools including IP geolocation analysis, IMEI tracking, domain/subdomain enumeration, email header analysis, and cell tower location mapping with real-time API integrations and fallback mechanisms.
- Built secure user authentication system with session management featuring role-based access control, encrypted user data storage.

MPOWER-Aditya Birla Education Trust: [Data Analytics and ML Intern]

June 2025 - July 2025

Prabhadevi, India

- Developed two major data science solutions: a machine learning model to predict customer churn and a computer vision system to automate attendance counting.
- Analyzed company data to build predictive models and visual dashboards, delivering key insights on client trends and business performance.
- Gained practical corporate experience by applying technical skills to solve real-world business problems under the guidance of senior mentors.

PROJECTS

EduNova-Learning Companion: [Node.js, Express.js, MongoDB, React.js, JWT, Gemini API, Render]

July 2025

- Developed a scalable full-stack learning platform with RESTful APIs, JWT-secured authentication, and real-time chat powered by Gemini API.
- Implemented personalized learning roadmaps, task management, and placement preparation tools, supporting CRUD operations and progress tracking.
- Integrated background task queues to optimize chatbot responses and handle heavy AI workloads asynchronously.
- Deployed on Render with automated builds and CI/CD workflows, ensuring reliable scaling, secure environment management, and production-ready delivery.

Diabetic Retinopathy Severity Detection using CNN: [Python, Flask, Tensorflow, Machine Learning]

September 2024

- Diabetic Retinopathy (DR) Detection which shows the severity of retina damage for the given retina image.
- CNN Model: The Pretrained Resnet50 model is used and Trained on the dataset with the images and the severity assigned to them in the dataset, the model gives severity in the range of 0-4 according to stage of DR, The CNN model gives **89 percent accuracy**.
- Website consists of Home page where the input of retina image is taken From the user and the processed output from the CNN model is displayed to the user on the result page.

Canteen Food Ordering Website: [PHP, HTML, Bootstrap, CSS, Javascript]

December 2023

- Built a Website with multiple pages and functionalities for ordering food from anywhere in the college from the college Canteen.
- Added Customer logins And Admin login with the dashboard of total Daily/Monthly sale and many other functionalities.
- Integrated **Razorpay test Payment Gateway** to website for making digital payments and easier for the Canteen to manage accounts.

Co-CURRICULAR ACTIVITIES

ITSA TECHNICAL HEAD:

June 2024-June 2025

- Planned and organized many Tech events for **Information Technology Student Association** Technical Committee And Built the Committee's Official Website.

CERTIFICATES

CDAC Data Analytics - CDAC MUMBAI

Supervised Machine Learning - Coursera

Advance Learning Algorithms - Coursera
